[Shi'hou]

The woman whose fiendish caterwauling had brought the wrath of the tribe down on our heads, now appeared decently veiled, a large metal bowl in her hands. This was passed round the circle, each partaker making a sucking noise as he drank. It required some courage to put one's lips to the bowl after it had been licked by those bearded ruffians, but the camel's milk it contained was cool and sweet. A dish of dates, covered with flies, was next produced, and out of sheer politeness we helped ourselves to a small portion. They tasted of fermentation and were full of grit.

While we were seated with our strange hosts I looked around the hut and noticed several pots and pans, very crudely made of a yellowish metal. Lifting one of these up, I handed it to the headman and indicated with a gesture that I should like to know what it was made of. The old man pointed to the mountains and grunted '*ga'ar*', which I found out afterwards was the *Shi'hou* word for gold. Apparently there are considerable veins of this mineral in the hills; it is smelted by the tribesmen who sell a proportion of it to the lowland Arabs, but also use it for their domestic utensils. Tin is also mined or washed in the streams.

When we could stand no longer the heat and stench of the hut we stood up and indicated to the headman that we should like to leave. He grinned very affably and, taking us by the hand, led us across the valley towards the crevice. The tribesmen followed, shouting and laughing and firing their rifles into the air. When we reached the top of the crevice we shook hands all round, a custom which they appeared to understand, and then thanked them in Arabic for their hospitality, which they did not understand, but which seemed to amuse them nevertheless. Just before we left them the headman unclasped his silver *hangar* from his waist and presented it to me. I have it still.

Our descent down the mountainside was much quicker than our ascent had been. We could hear the tribesmen's rifles cracking away in the valley, and feared that they might suddenly change their minds again and begin firing at us. Fortunately no untoward incidents occurred, apart from Stanton losing his foothold and falling twenty feet down a sharp escarpment, thereby skinning his arm from wrist to elbow. Within half an hour we had reached the base of the foothills and could see the Khan Sahib's house in the distance. The time was now five o'clock and I realized that the rest of the party would be getting somewhat impatient.

We found the Khan Sahib pacing up and down his beautiful

244 and various vegetables are cultivated in the inland valleys. Cows, goats and other live-
233 stock are raised in the towns and the vil-
361 lages, but camels, goats and sheep are the mainstay of the Bedouin.

816 Ocher is mined on the offshore island of
471 Bu Musa, but no other mineral deposits of
135 commercial value are known to exist. The Petroleum Development (Trucial Coast) Ltd., a subsidiary of the Iraq Petroleum Company, holds concessions for the exploitation of the oil reserves of Trucial Oman, and is conducting exploratory operations in the area. The discovery of oil would undoubtedly have a revolutionary effect upon the economy and the standards of living of the people.

361 A large majority of the inhabitants dwell in the headquarters towns of the different sheikhdoms or in adjacent fishing or agricultural villages. Most of the towns are compact, with narrow, crooked streets, darkened by projecting balconies and matting canopies put up for protection from the sun. Dibai, the largest, is a walled town with an estimated population of over 20,000. Sharja, the second in size, is a settlement of 3,000 to 15,000 which is unwalled but surrounded by a fringe of palm thatch, or *barasti*, huts.
342 The homes of the wealthy merchants are of
361 two stories with wide balconies and spacious inner courts, but those of the poor are usually simple one- or two-room huts of mud brick or palm thatch. The Bedouin live in the traditional black goat's hair tents of the nomadic tribes. They move about with their herds, following fresh pastures in the winter and congregating around desert wells in the
361 summer. A few join the fishing or the pearl-
228 ing fleets during the summer season, while their families camp in the vicinity of the towns.

144 The nutritional habits of the people vary
571 with the racial, the social and the economic backgrounds of the diverse communities. Poverty and lack of adequate transportation facilities restrict the foodstuffs available to a large percentage of the population.
262 Dates, breads prepared from wheat or mil-
